NDA TAILGATE SAFETY TIPS

TST's are a positive way of communicating to your employees that your company is serious about their health and safety. They can be used in employee safety meetings and can be an important part of your company's safety program. Although TST's are not a substitute for formal training, they can be used to document that your company is promoting safety in the workplace.

You should document your use of TST's as you would document any training session to provide evidence of good faith effort in your safety program in the event of an OSHA or MSHA inspection. The TST's also provide a record of training in case of an injury or lawsuit. NDA provides a Tailgate Safety Meeting Report sign-off sheet to assist in recording such documentation.
